

Comparison Summary:

AppEsteem Certified vs. AppEsteem Deceptor

Illustrations of uneven application of "deceptor criteria", resulting in products being (and remaining) certified while displaying identical or substantially similar behaviors as so-called "deceptor" products.

Where possible, we have endeavored to remove any identifying elements (e.g., product and company names).

The CSA also documented certified software in violation of AppEsteem rules - ACR-007, ACR-005, ACR-016, ACR-099 which are not published here to avoid potentially harming the software vendors.

ACR-003: "Consumers are not misled to believe they have an issue, a problem with, something out of date, or something missing from their system. This includes no exaggerated or unsubstantiated claims about system's health".

AppEsteem
Deceptor

The screenshot shows the AppEsteem Deceptor interface. At the top, a red banner with a yellow warning icon says "Attention! 49 System issues found". Below this, a table lists four categories of issues:

Category	Issues	Improvement Potential
Malware/PUP Threats Programs leaving your system vulnerable to malicious attacks	3	Low to High
System Performance Issues Issues impacting system performance	7	Low to High
System/User Software Issues Issues impacting system and user installed software performance	30	Low to High
Startup/Uninstall and User Issues Issues impacting system startup time and user space	9	Low to High

At the bottom, a red box highlights "Total issues found: 49". A green "Start Repair" button is visible in the top right and bottom right corners.

AppEsteem
Certified

The screenshot shows the AppEsteem Certified interface. On the left, a red box contains a "60 day MONEY BACK GUARANTEE" badge and the text "Try it RISK FREE". On the right, a dark grey box with a red warning icon says "found 29 outdated drivers or game drivers left on your system, which may result in slow PC performance, system crashes, game glitches and threaten your PC's stability." Below this, a yellow "80% OFF" discount is shown with a countdown timer: 09 MINUTES, 33 SECONDS, 422 MILLISECOND. At the bottom, there are "Exit" and "Purchase Now" buttons.

ACR-007: "Has no false claims or implications to be from another vendor or misleading users about their source, owner, purpose, functionality or features".

AppEsteem Deceptor

Duplicate Photo Fixer Pro Reviews

DPF helped me to recover more than 20GB of space on my hard drive. It not only detects same photos but similar ones that were taken seconds apart.

Owen Marsh
New Jersey

Photos in my hard drive now looks sorted after deleting enough duplicate images using DPF. It finds the right matches and is easy to adjust.

Antony Hecox
Germany
